

MAYUR GANGIREDDY

Hyderabad, Telangana 500035 | +91 6281192139 | mayurgangereddy12345@gmail.com | [Github](#) | [LinkedIn](#) | [Portfolio](#)

Career Objective

I am a Computer Science graduate passionate about building intelligent systems and solving real-world problems. With hands-on experience in machine learning and software development projects, I enjoy turning data and ideas into practical, scalable solutions. Seeking an entry-level Software Development or ML Engineer role to grow and contribute meaningfully.

Education

SPHOORTHY ENGINEERING COLLEGE, HYDERABAD, INDIA Hyderabad, TG <i>Bachelors of Technology in Computer Science-AIML</i>	2021-2025
SRI GAYATRI JUNIOR COLLEGE, HYDERABAD, INDIA Hyderabad, TG <i>Board of Intermediate Education - MPC</i>	2019-2021

Skills

Programming Languages: Python, Java, C, JavaScript, C++
Machine Learning: CNN, Time-Series Modeling, Scikit-learn, XGBoost
Database and Data Storage: Firebase, Supabase
Tools: Visual Studio, Jupyter, PyCharm, Android Studio, Git
Frontend: HTML, CSS.

Projects

Post-CNN framework for precise ship detection in high-resolution optical satellite imagery – Designed a post-CNN framework for precise ship extraction from high-resolution satellite imagery. Implemented water/non-water classification followed by CNN-based ship detection.

Android Applications: Developed the **Criminal Laws by TGPA** app, available on the [Play Store](#), to enhance operational efficiency for the Telangana State Police and also developed the **SPHN Hostel** app, designed to streamline hostel management, yet to be launched

Intelligent Agricultural & Climate Data Q&A System: Designed a conversational analytics system that answers natural language queries by integrating government crop production and rainfall data, enabling cross-domain insights with full data traceability.

Multimodal Emotion Detection System (Face + Voice): Developed a Streamlit-based multimodal AI system for emotion recognition using a trained EfficientNet-B4 for facial emotions, MFCC-based MLP for speech emotion classification, and confidence-weighted fusion for final predictions.

Internships

Java Programmer - Acmegrade - Designed, implemented, and maintained Java-based applications that can be high-volume and low-latency - Envisioned system features and functionality	11/2023 to 01/2024
Machine Learning (ML) Engineer - Bharat Smart Services - Developed a multi-model NILM system for appliance-level energy disaggregation. - Built and trained CNN models for smart meter identification and appliance classification using time-series power data.	01/2026 – Present

Certifications

- Certified C, Java, and Python Programmer – HackerRank
- IBM SkillsBuild (Artificial Intelligence Fundamentals)
- Top 5 Finalist – Smart India Hackathon
- Advanced Artificial Intelligence with Python – EdVedha
