SUMMARY

Software engineer across mobile, backend and ML. Shipped 3 apps on Google Play and the App Store, including a utility app with **500K+ downloads**, and built an encrypted LLM data layer on the Model Context Protocol that the company sells to enterprise clients. Stack: **Python, TypeScript/React, Node.js, SQL, Android/iOS**.

EXPERIENCE

Bharat Smart Services – **Machine Learning & Full-Stack Engineer** — **Jan 2026 – Present | Hyderabad**

- Built and deployed **NerveNet**, an **MCP**-based AI agent platform sold to enterprise clients on contract. A client-side proxy encrypts (AES-256) and tokenizes private CSV/SQL data, so cloud LLMs never see raw company records.
- Engineer on the **Bharat Smart Services** utility app (**500K+ downloads, 4.0★ from 1.6K reviews**; React + Capacitor) Play App Store for meter billing at TSSPDCL, TSNPDCL and HMWSSB; wrote **native Java USB-serial drivers** for IR meter dongles, camera **OCR** reading capture and home-screen widgets.
- Built **Bharat Smart Home** Play App Store (1K+ downloads, 5.0★), an IoT app for room and device control, scheduled automations, scenes and energy usage.
- Led **NILM** energy-disaggregation R&D on 5-second smart-meter data from pilot homes: benchmarked CNNs and Transformers against **XGBoost**, which performed best (**96% F1** on geysers, **~85%** on AC, fridge and washing machine).

Telangana State Police Academy (TGPA) – **Android Developer** — **Mar 2024 – Aug 2024 | Hyderabad**

- Sole developer of **Criminal Laws by TGPA** Play, the academy's official legal app for officers (**1K+ downloads, 5.0★ from 84 reviews**): **offline search under 50 ms** (SQLite FTS) and old-vs-new law comparison.

Internships – **EY GDS × AICTE (MERN, Mar–Apr 2025) • Acmegrade (Android, Nov 2023–Jan 2024)** — **Remote**

- MERN-stack modules with REST APIs and JWT auth (EY); Java Android modules with REST and SQLite caching (Acmegrade).

CLIENT PROJECTS

- **Temple donation kiosks:** admin portal (React, Node.js, MySQL) with zero-fee **UPI QR** donations, plus an offline-capable Android TV app (Kotlin, Compose). Live at temple sites.
- **Hostel Hub Pro:** multi-tenant SaaS with a TanStack Start web app, **Flutter** app and Express/MySQL API; **HMAC-signed QR gate passes** with nonce checks to stop reuse.
- **SignageHub:** cloud scheduling dashboard plus a local server that auto-pairs Android TV screens over **UDP** and keeps playlists running offline.

OPEN-SOURCE AI PROJECTS

- **Samarth – NL-to-SQL** GitHub: LLM agent that answers plain-English questions over government data; SQL is AST-checked before running on **DuckDB** and shown with every answer.
- **Satellite Ship Detection** GitHub: land masking plus **YOLOv8** to detect ships in satellite images with fewer coastline false positives.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, Kotlin, SQL, Dart, C/C++

AI / ML: PyTorch, XGBoost, Scikit-Learn, Time-Series Modeling, CNNs, Transformers, YOLOv8, OpenCV, OCR, LLM Agents, Model Context Protocol (MCP), NL-to-SQL

Backend & Data: Node.js, Express, FastAPI, Flask, REST APIs, PostgreSQL, MySQL, SQLite, DuckDB, Supabase, Firebase

Frontend & Mobile: React, TanStack Start, Tailwind CSS, Android (Java, Kotlin, Jetpack Compose, Android TV), Capacitor, Flutter, iOS WidgetKit

Tools: Git, Docker, Linux, Postman, Android Studio, Xcode, Plesk, Render, Vercel

EDUCATION & ACHIEVEMENTS

Sphoorthy Engineering College – B.Tech, Computer Science & Engineering (AI & ML) — **2021 – 2025 | Hyderabad**

Grand Finalist – Smart India Hackathon 2022 (Ministry of Education) | **3 published apps**, one with 500K+ downloads
